

SW-218BL

FEATURES

- ✓ Designed for large size room
- ✓ High power handling
- ✓ Extremely low harmonic distortion
- ✓ Extended excursion capability

Developed especially for large size cinema theatre, the **SW-218BL** provides sharp and fast extended low frequency.

As members of the Black Edition series, those high performance solutions offers powerful, smooth and accurate reproduction of cinema soundtracks.

SPECIFICATIONS

SW-218BL

HARDWARE

Frequency response (-10dB) ¹	28 Hz
Continuous AES Power ²	2000 W
Continuous Program Power ³	2800 W
Sensitivity (1w/1m) ⁴	97 dB SPL
Rated Maximum SPL (1m)	132 dB
Rated impedance	4 Ω
Dimensions (HxWxD)	1330 mm x 750 mm x 550 mm
Net Weight	74 kg

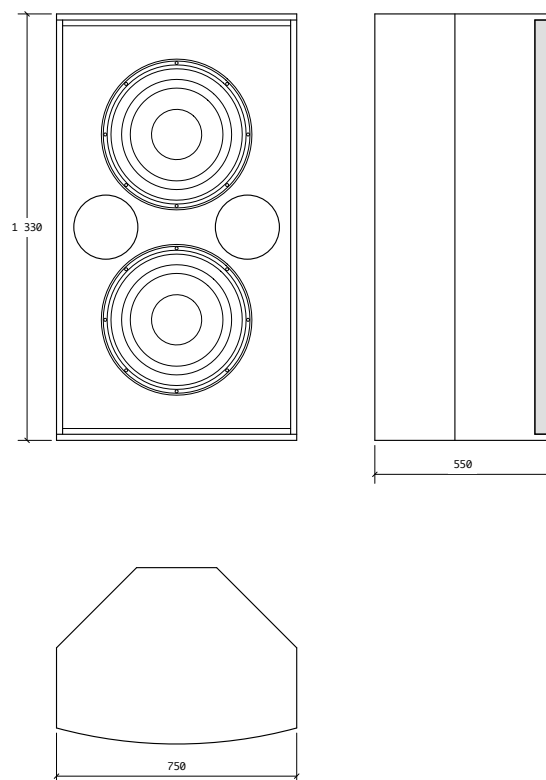

¹Free field, -10dB from on-axis sensitivity

²AES continuous pink noise, 2 hours duration.

³Continuous program power is defined as 3 dB greater than AES continuous pink noise and is a conservative expression of the transducer's ability to handle normal music program material.

⁴Average measured free field, 2.00V, 1m
